TITLE : COMPACTION MOLDING DEVICE

ABSTRACT : PROBLEM TO BE SOLVED: To provide a compaction molding device for small-sized parts adequate to small-quantity production or test production of the small-sized parts.

SOLUTION: Metallic power 55 is compaction molded to green compacts by an upper punch 19 of a compaction jig 15 by utilizing the pressurizing force of an existing pressurization testing machine, by which the compaction molding device for the small-sized parts adequate to small-quantity production or test production of the small-sized parts is obtd by merely preparing the compaction jig 15. Then, the easy small-quantity production and test production of the small-sized parts of the green compacts are 4 made possible.
